

IRADUKUNDA Christian

Front-End Developer

Kigali, Rwanda · +250 798 697 759 · christianira2003@gmail.com · github.com/chriskunda

Front-end Developer(React · HTML/CSS) currently building user-facing interfaces for production systems for a london-based client remotely. I specialized in building custom, polished UIs and Mobile apps to replace off-the-shelf tools from booking and scheduling experiences to cross-platform mobile apps.

EXPERIENCE

Dar Fatima · Front-End Developer (Part-Time)

July 2025 – Present | London, UK

- Built a custom full-stack booking system from scratch to replace the client's WordPress/Amelia setup
- Designed a timezone-aware scheduling engine connecting teachers and students across different countries
- Integrated Google Calendar API so bookings automatically appear on both teacher and student calendars
- Integrated Email and WhatsApp APIs (via Meta) for automated booking notifications and confirmations
- Built a companion React Native mobile app (iOS & Android) for on-the-go booking management
- Deployed and maintained the production environment via CloudPanel, Nginx, and SSH

PROJECTS

Dar Fatima · Front-End

July 2025 – Present | London, UK

- Designed and built the full booking UI with React, including calendar views, time slot selection, and confirmation flows
- Implemented timezone-aware scheduling UI that dynamically adjusts available slots based on user location
- Built the UI for a timezone-aware scheduling experience connecting teachers and students across different countries

Kigali Puppies — Pet E-Commerce Platform · <https://kigalipuppies.com> | Oct 2024 – Mar 2025

- Full e-commerce site for purchasing puppies in Kigali with mobile money checkout (Intouch Communications)
- Designed and built the product listing UI, puppy detail pages, and image galleries
- Implemented the mobile money checkout flow (Intouch) on the front-end with real-time payment status updates

Auto Accessories Hub — Tyres, Rims, Accessories E-commerce Platform · Oct 2025 – Apr 2026

- Full e-commerce website that for purchasing tyres, rims, car accessories and help booking appointment for wheel alignment.
- Built the front-end for an e-commerce platform for tyres, rims, and car accessories
- Developed a service booking UI for customers to schedule wheel alignment appointments
- Implemented product filtering, search, and a cart system using React and Tailwind CSS

SKILLS

Languages: JavaScript, Typescript

Frontend: React, Tailwind, HTML/CSS

Tools: Git & GitHub, Figma

EDUCATION

Adventist University of Central Africa (AUCA) · Bachelor's Degree in Software Engineering

Jan 2025 – Present | Kigali, Rwanda

- Studying core software engineering principles including algorithms, data structures, systems design, and software architecture
- Coursework covers object-oriented programming, database management, operating systems, and software project management
- Actively applying academic learning through real-world freelance projects and open-source work
